

SECURITY

Protect your information and keep your office environment secure.

SMTP Authentication

This security tool enables the sending of documents via e-mail with authentication by an SMTP enabled server. Ideal for smaller offices without a private e-mail server, a connection to an SMTP enabled server allows SSL communication, so e-mails can be sent in a security-conscious state.

Watermark Your Documents

Ensure your documents are clearly labelled to help prevent them falling into the wrong hands. Choose from a range of watermark options to suit the purpose of your document.

Account Tracking

Enable Account Track on your bizhub to require a three-digit account number to use the Copy feature. This prevents unauthorized users from using the bizhub and tracks the volume of copying done by each account.

ACCOUNT NO. :---
Input=10Key

Secure Print

When you enable this option, a password is required at the bizhub itself before a document will print. Set the password via the print driver at your computer, then enter it on your bizhub's control panel to start the print job. This prevents confidential documents from lying around the office or being accessed by an unauthorized user.

*Passwords can be set in the range 0000~9999.
